Tom,
See the response from below from Betsy O'Brien who oversees the evidence area.

We have pretty much been able to prepare final analysis results for all expedited requests. In a real pinch we are still doing the occasional "preliminary" certificate. The best case scenario is to wait for the final cert, we have really tried to stay away from "prelims". The ADA's have been 99% of the time getting only final certs for a couple of years now, even when expedited.

Julie--I had one followup Q to our discussion of yesterday, that one of my fellow ADAs raised: when a request for expedited analysis is made, will the response be a preliminary certificate, or is the lab no longer doing prelims? Thanks!
